

How to embed google calendar in your app

Go to the setting section of the calendar you want to display in the app.

Next click the customization link.

e.g. "San Francisco" or "New York" or "USA." Specifying a general location will help people find events on your calendar.

This calendar uses your current time zone: (GMT-05:00) Eastern Time [Set my time zone](#)

page.

Paste this code into your website.

[Customize the color, size, and other options](#)

```
<iframe
src="https://www.google.com
/calendar
/embed?src=cedarspringscalendar
%40gmail.com&ctz=America
/New_York" style="border: 0"
```

[XML](#) [ICAL](#) [HTML](#) (Calendar ID: cedarspringscalendar@gmail.com)

This is the address for your calendar. No one can use this link unless you have made your calendar public.

Next, Enter a title, uncheck everything except Title, set the width to 400 and click "update html".
